

7 - MACHINE COMMISSIONING

Commissioning of the machine is ensured by our Technical Department.

For commissioning, prepare some sheet metal plates for testing : 200 mm wide strips, length depending on your machine capacity.

Select sheet metal nature and thicknesses generally used for your production requirements.

IMPORTANT

AS WE ENSURE INITIAL START UP OF THE MACHINE, ANY USE OF THE MACHINE BEFORE ARRIVAL OF OUR TECHNICIANS WILL RESULT IN THE SUSPENSION OF OUR WARRANTY. THIS SUSPENSION WOULD BE LIFTED ONLY ONCE THE MACHINE HAS BEEN TESTED AND, IF NEED BE, REPAIRED AT THE CUSTOMER'S EXPENSE.
