

## 8 - OPERATING AND STORAGE CONDITIONS

So as to ensure long life for the electronic and hydraulic components, the minimum and maximum temperatures to be observed are as follows :

	Mini	Maxi
Ambient temp. ....	-10°C	+50°C
Cabinet use ambient temp.....	+5°C	+50°C
Oil temp. ....	+5°C	+80°C
Relative humidity .....	20%	75%

For temperatures below 5°C the electronic cabinet must be left ON so that components and circuit can remain at a normal temperature.
